COMPACT+ LOADERS

AMENITY

The precision
is yours!

A M E N I T Y
LOADER RANGE
COMPACT+

**QUALITY AND EASE OF USE
THAT'S THE MX PHILOSOPHY**

MX COMPACT+ loaders are made to the same exacting standards as our large range loaders, incorporating the same features, quality of finish and reliability.

Impeccable build quality
MX use the very latest manufacturing techniques from initial steel profiling up to final assembly of the loader; quality is guaranteed.

Quality finish
COMPACT+ loaders initially go through an intensive shot blasting process which allows perfect adherence of the paint. The result is a highly resistant, glossy surface finish.

Systematic Test
All functions of MX COMPACT+ loaders are fully tested before despatch. Product reliability is guaranteed from day one.

The precision **is yours!**

COMPACT+ loaders are derived from years of MX experience, they allow even the most challenging handling operations to be made with complete confidence and security; with maximum comfort.

A complete range
for compact tractors
15-65 HP

WEIGHTS P.9

Operator comfort on all types of terrain

Whilst working in total comfort tiredness is reduced, this allows complete attention to the task in hand. COMPACT+ loaders allow you to work more efficiently, resulting in complete “peace of mind”.

Shock Eliminator System®

Superior comfort and balance

With the aid of the Shock Eliminator System the ride quality of the tractor/loader unit is significantly improved. Additionally, it eliminates any shocks caused by rapid loader movements.

Multifunctional lever

Supple and ergonomic

A professional loader control system comprising of an independent hydraulic valve and multi-axis control lever. Lift and crowd functions can be operate simultaneously. One single lever to operates all functions of the loader. Supreme comfort, maximum precision.

Without Shock Eliminator®

With Shock Eliminator®

Instant loader to tractor hitching

Connected with an easy to use and safe pin mechanism the loader can be removed from the tractor in seconds. The loader sub frame is designed to match each specific tractor make and model which ensures a compact design with unrestricted access to maintenance points.

Work with optimum efficiency

In today's busy working environment a machine with good performance is not enough, to achieve maximum efficiency it must also offer a high level of automation. With a COMPACT+ loader you will never hesitate to remove the loader or interchange implements where necessary.

Safe hitching

With clear all round visibility the loader hitching procedure is easy and safe.

Rapid hitching.

Hitched to the tractor in seconds; the pin locking mechanism is simple and quick.

Easy to use parking stands

Parking stands are easy to set up due to their simple design. When not in use they can be neatly stored on the inside of the loader beams. This gives the added benefit that the underneath of the loader is free of any protrusions that may damage trailer boards.

Automatic implement to loader hitching

Implements are easily hitched whilst sitting in the tractor seat, simply drive in, pick up, and then fully crowd back to automatically lock the implement. Unhitching is made simple by a well positioned mechanical lever.

Never any hesitation to change implements. Hitching and unhitching is simple, you can easily swap implements, ensuring you use the one most appropriate for the task at hand.

See page 8-9 for full range of implements

Implements for every task

MX offer a wide range of implements, all of which are easy to use and highly durable. They offer optimum efficiency and become a valued asset to achieve your day to day handling requirements.

Loose Material Bucket
A general purpose bucket available in 4 widths. They incorporate a cylindrical back promoting effective tear-out and easy bucket filling.

	20C+	25C+	30C+		
BRC 92	*	*		120 L	155 L
BRC 120	*	*	*	160 L	210 L
BRC 140		*	*	190 L	250 L
BRC 160		*	*	210 L	270 L

4 in 1 Bucket
A truly universal implement which can be used for digging, loading, grading etc.

	20C+	25C+	30C+		
BQU 120	*	*			210 L
BQU 140		*	*	185 L	240 L

Multi Service Bucket
A multi-purpose implement combining a bucket, reliable and easy to use.

	20C+	25C+	30C+	
BMSC 130		*	*	296 L
BMSC 150			*	342 L

Manure Fork
With its long tines (650 mm) this implement is ideal for clearing manure. The optional top grab further enhances its performance.

BFC 115	*	*	*

SPECIFICATION

	MX 20C+	MX 25C+	MX 30C+
Maximum height at implement pivot*	2,15 m	2,45 m	2,60 m
Maximum height under horizontal bucket (1)	1,95 m	2,25 m	2,35 m
Maximum height under dumped bucket (2)#	1,60 m	1,90 m	2,00 m
Digging depth #	0,15 m	0,15 m	0,15 m
Dumping angle at full height (3)#	68°	68°	68°
Dumping angle at ground level (4)#	90°	115°	122°
Crowd angle (5)#	45°	45°	45°
Forward reach available for discharge (6)#	850-950 mm	950-1050 mm	1050-1150 mm
Lift force at implement pivot*	660 kg	730 kg	1400 kg
Lift capacity at implement pivot over the entire lifting range*	570 kg	630 kg	990 kg
Lift capacity on pallet 0.50m out on forks at ground level*	490 kg	540 kg	1280 kg
Payload on pallet 0.50m out on forks at 1m from ground	450 kg	500 kg	1150 kg
Payload on pallet 0.50m out on forks at 2m from ground level	410 kg	450 kg	1000 kg
Payload on pallet 0.50m out on forks at full height	390 kg	425 kg	710 kg
Lifting time	4,5 sec	4,5 sec	3,8 sec
Dumping time	2,2 sec	2,5 sec	3,3 sec

Values may vary according to type of tractor used.
 Characteristics measured at:
 - MX 20C/MX25C: 140 bars at a flow rate of 20 litres/min
 - MX 30C: 180 bars at a flow rate of 30 litres/min.
 *Only payload lift capacity should be considered, values at ground level and at implement pivot are not working data.

3rd Function:
for powered implements
Electro-valve fitted to the loaders cross beam, protected by a metal guard.

Mach2®
Quick and easy connection of implement hydraulic lines.
Strong, reliable and easy to use, Mach2 system enables the implement hydraulic lines to be coupled in one simple action, even under pressure.

OPTIONS

Linkage and weights

A range of front linkages compatible with COMPACT+ loaders, a useful combination to ensure that the tractors full potential is utilised.

MX R05 Capacity of 500 kg
 MX R08* Capacity of 800 kg
 (*Availability to be confirmed)

Weights of 250 and 400kg (category 1).
 Their flat base allow easy hitching on all types of ground.

Top Grab for Manure Fork.
 Strong and durable, this is a useful addition to a manure fork. It's 470 mm tines are bolt-on to allow easy maintenance.

	20C+	25C+	30C+
GFC 120	*	*	*
300 L			

Manubal
 Equipped with two cruciform tines this implement promotes easy and quick handling of round or square bales. Purposely designed for our range of Compact+ loaders it perfectly meets the needs of smallholders and equestrian users.

	20C+	25C+	30C+
BRC 10	*	*	*

Pallet Fork and Carrier
 Pallet tines are 1000 mm in length and their spacing is fully adjustable allowing easy handling of most types of pallets up to 800kg.

	20C+	25C+	30C+
TRC 800	*	*	*

LOADER RANGE
COMPACT+

**SELF-LEVELLING PARALLELOGRAM:
A NEW LEVEL OF USER COMFORT**

The self-levelling parallelogram automatically retains the implement angle, allowing effortless use of the loader.

User friendly

The operator is able to lift or lower the loader without continuously correcting the implement angle.

Optimum Visibility

Due to the absence of levelling rods above the loader boom all round visibility is exceptional.

Compact dimensions

The loader retains its small size, best suited for the work for which it is designed.

Exceptional performance **with unrivalled precision**

With their simple and rational concept, derived from the MX know-how, COMPACT+ loaders are ideal for your day to day amenity handling requirements.

Optimum lift height

MX COMPACT+ loaders offer optimum forward reach at maximum lift height, allowing effortless unloading of materials into a trailer, and easy stacking of pallets.

Optimum bucket crowd angle for more productivity
Carefully considered geometry between the loader's crowd mechanism and bucket generate maximum crowd angles. Filling the bucket is simple, with minimal material spillage.

Optimum bucket dumping angle for more efficiency
With its very impressive bucket dumping angle, clean and quick material discharge is guaranteed.
